

Oktopous™ Call Control Engine

A modular event engine to create sophisticated, event-based & asynchronous call control capabilities into your Cloud Telephony System.

Oktopous™ fully implements the W3C ccXML 1.0 Specification. By executing simple ccXML documents, it controls how phone calls are placed, answered, transferred, conferenced, and more.

Cloud Telephony Applications:

Automated Call Distribution (ACD)

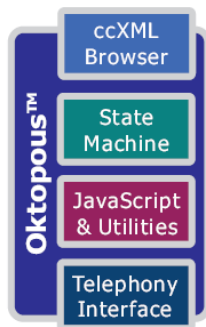

Web Telephony, Conferencing & Collaboration,
IP-PBX, IP Centrex.

Outbound Calling for
alerts and emergency
notifications.

Call Recording and Logging

Click to Call

Web Callback

Availability:
